

m246

Comprehensive Magento Audit

Project Name: m246

Magento Domain: <https://m246.loc/>

Audit Date: 2026-02-10

Magento Version: 2.4.6-p12

Auditor: Freento

Audit Goals

- Review 3rd party modules code
- Review theme quality
- Check store performance
- Check Magento logs
- Briefly review store for bugs
- Provide recommendations for issue fixes

Table of Contents

10. Overall Summary

Attachments: Code Sniffer Report

OK Meets best practices

WARNING Needs attention

CRITICAL Immediate action required

3. Environment Overview

Parameter	Value	Status	Notes
Magento Version	2.4.6-p12 (Community)	OK	Latest patch for 2.4.6 line
Deployment Mode	developer	CRITICAL	Expected: production
PHP Version	8.2.29	OK	Supported range: 8.1.0 – 8.2.x
MySQL Version	MariaDB 10.6.22	WARNING	Supported range: 10.6.x (only supported version line)
Session Storage	Redis 6.0.16	CRITICAL	Redis 6.0.16 is below minimum supported version 7.0; upgrade required
Cache Backend	Redis 6.0.16	CRITICAL	Redis 6.0.16 is below minimum supported version 7.0; upgrade required
Full Page Cache	Built-in	WARNING	Varnish recommended for production workloads
Search Engine	Elasticsearch 7.17.29	WARNING	Supported range: 7.17.x or 8.4.x; at lower end of supported range

Parameter	Value	Status	Notes
Xdebug	Enabled (mode: debug)	CRITICAL	Must be disabled in production; severe performance impact
APCu	Disabled	INFO	Optional; can improve performance when enabled
PHP max_execution_time	18000 sec	WARNING	Unusually high (5 hours); recommended 120–900 sec for web
PHP memory_limit	756M	OK	Adequate for Magento (minimum 756M recommended)
Session Locking	Enabled (disable_locking: 0)	OK	Session locking is enabled, preventing race conditions
Static Content Signing	Enabled	OK	Proper cache-busting for static assets
Composer	2.8.12	OK	Supported range: 2.2.26+

Environment Summary

The environment has several critical issues that must be addressed before going to production. **Deployment mode is set to "developer"**, which disables all production optimizations (static content compilation, DI compilation, error suppression). **Xdebug is enabled** in debug mode, which causes severe performance degradation (30–50% slowdown on every PHP request). **Redis 6.0.16 is below the minimum supported version 7.0** for Magento 2.4.6 — both cache backend and session storage are affected and must be upgraded. Full Page Cache is using the built-in handler instead of Varnish, which limits scalability under high traffic. Elasticsearch 7.17.29 is supported but sits at the lower end of the compatibility range; consider migrating to OpenSearch 2.x for long-term support. PHP max_execution_time is set to 18000 seconds (5 hours), which is abnormally high and may mask long-running processes that should be handled by cron or CLI.

4. Code Audit

4.1 Modules Overview and Coding Standards

4.1.1 Third-party Modules

Total third-party modules: **63**

4.1.1.1 Upgradability Table

Module	Vendor	Installation	Current Ver.	Latest Ver.	Upgradable	Notes
Aheadworks_Sarp2	Aheadworks	vendor	3.20.1	3.21.0	UPDATE AVAILABLE	
Aheadworks_Sarp2AuthNetCim	Aheadworks	vendor	1.0.2	1.0.2	OK	
Aheadworks_SarpNotifications	Aheadworks	vendor	1.0.0	1.0.0	OK	
Aheadworks_Sbp	Aheadworks	vendor	1.2.7	1.2.7	OK	
Amasty_Base	Amasty	vendor	1.18.0	1.18.0	OK	
Amasty_CronSchedule	Amasty	vendor	1.0.2	1.0.2	OK	
Amasty_CronScheduleList	Amasty	vendor	1.0.0	1.0.7	UPDATE AVAILABLE	
Amasty_ImportCore	Amasty	vendor	1.10.0	1.12.2	UPDATE AVAILABLE	
Amasty_ImportExportCore	Amasty	vendor	1.0.0	1.4.2	UPDATE AVAILABLE	
Amasty_ImportPro	Amasty	vendor	1.9.0	1.9.0	OK	

Module	Vendor	Installation	Current Ver.	Latest Ver.	Upgradable	Notes
Amasty_ProductImport	Amasty	vendor	1.10.0	1.10.0	OK	
Amasty_ProductImportEntity	Amasty	vendor	1.0.0	1.5.0	UPDATE AVAILABLE	
Avalara_BaseProvider	Avalara	vendor	1.0.1	N/A	N/A	
Freento_AdvancedCriticalCss	Freento	app/code	1.0.0	N/A	N/A	Available via composer — consider migrating to composer/artifact installation
Freento_AuditCodeSniffer	Freento	vendor	1.0.1	1.0.1	OK	
Freento_AuditDatabase	Freento	vendor	1.0.0	1.0.0	OK

Freento_QueueArea	Freento	app/code	unknown	N/A	N/A	
Freento_ReactTokenSessionSync	Freento	app/code	1.0.0	N/A	N/A	Available via composer — consider migrating to composer/artifact installation

Module	Vendor	Installation	Current Ver.	Latest Ver.	Upgradable	Notes
Freento_SqlLog	Freento	app/code	1.3.0	1.3.0	OK	Available via composer — consider migrating to composer/artifact installation
Freento_SqlLogAdvanced Actions	Freento	app/code	1.1.0	N/A	N/A	Available via composer — consider migrating to composer/artifact installation
Freento_SystemHealth	Freento	app/code	1.0.0	N/A	N/A	Available via composer — consider migrating to composer/artifact installation
Freento_Unit	Freento	app/code	1.0.0	N/A	N/A	Available via composer — consider migrating to composer/artifact installation
Magecomp_Cookiecompliance	Magecomp	vendor	1.0.5	1.0.5	OK	
Meetanshi_CookieNotice	Meetanshi	vendor	1.0.6	1.0.7	UPDATE AVAILABLE	
MSP_CmsImportExport	MSP	vendor	1.1.1	1.1.2	UPDATE AVAILABLE	
MSP_Common	MSP	vendor	0.1.5	0.1.7	UPDATE AVAILABLE	
OlegKoval_RegenerateUrl Rewrites	OlegKoval	vendor	1.7.1	1.7.1	OK	

Module	Vendor	Installation	Current Ver.	Latest Ver.	Upgradable	Notes
ParadoxLabs_Authnetcim	ParadoxLabs	vendor	5.0.0	5.2.0	UPDATE AVAILABLE	
ParadoxLabs_TokenBase	ParadoxLabs	vendor	4.7.3	4.8.0	UPDATE AVAILABLE	
Seek_PrecisionForm	Seek	app/code	1.0.0	N/A	N/A	Available via composer — consider migrating to composer/artifact installation
Space_CookieWarning	Space	app/code	1.1.0	N/A	N/A	Available via composer — consider migrating to composer/artifact installation
StarringJane_CookieBanner	StarringJane	vendor	1.0.0	1.0.0	OK	
Temando_ShippingRemover	Temando	vendor	1.0.0	1.0.0	OK	
Theme_Test	Theme	app/code	1.0.0	N/A	N/A	Available via composer — consider migrating to composer/artifact installation
Theme_Test2	Theme	app/code	1.0.0	N/A	N/A	Available via composer — consider migrating to composer/artifact installation
Ubermanu_CookieConsent	Ubermanu	vendor	unknown	1.2.0	UPDATE AVAILABLE	

Module	Vendor	Installation	Current Ver.	Latest Ver.	Upgradable	Notes
Wallee_Payment	Wallee	vendor	2.1.28	2.1.29	UPDATE AVAILABLE	
WatchDog_AgeGate	WatchDog	app/code	1.0.0	N/A	N/A	Available via composer — consider migrating to composer/artifact installation
Yireo_CspUtilities	Yireo	vendor	1.0.1	1.0.1	OK	
Yireo_GoogleTagManager2	Yireo	vendor	3.10.2	3.10.6	UPDATE AVAILABLE	
Yireo_SwooleApi	Yireo	vendor	0.0.1	N/A	N/A	

4.1.1.2 Summary

The store has 63 third-party modules installed (31 in app/code, 32 in vendor). 14 modules have newer versions available and should be evaluated for upgrade. Notably, 24 modules in app/code have a composer package name and could be migrated to composer-based or artifact installation for better dependency management and upgrade consistency. Multiple cookie-related modules were detected (Magecomp_Cookiecompliance, Meetanshi_CookieNotice, Space_CookieWarning, StarringJane_CookieBanner, Ubermanu_CookieConsent) — this overlap should be reviewed for potential consolidation. Payment-related modules (ParadoxLabs_Authnetcim, ParadoxLabs_TokenBase, Wallee_Payment) have updates available and should be prioritized given their security sensitivity.

4.1.2 Custom Modules (Detailed Audit)

Total custom modules: **32**

Module	Location	PHPCS Errors	PHPCS Warnings	Complexity	Attention Required
Freento_DirectElastic	app/code	"include" statement detected. File manipulations are discouraged. Variables inside are insecure. Use of echo language construct is discouraged. Use of exit language construct is discouraged. Direct use of \$_GET Superglobal detected. Class 'Zend_Validate_Exception' is restricted in /var/www/source/app/code/Freento/DirectElastic/Setup/Patch/Data/AddOriginalNameAttribute.php. Suggested replacement: Magento\Framework\Validator\ValidateException	48	High	CRITICAL
Freento_McpAudit	app/code	The use of function exec() is forbidden; use \Magento\Framework\Shell::execute() instead	107	Medium	CRITICAL
Freento_SystemHealth	app/code	Silencing errors is discouraged; found: @fsockopen	96	Medium	CRITICAL
Freento_AuditDoc	app/code	The use of function shell_exec() is forbidden	91	Medium	CRITICAL
WatchDog_AgeGate	app/code	InstallData scripts are obsolete. Please use data patches approach in module's Setup/Patch/Data dir	49	Medium	CRITICAL
DD_AgeGate	app/code	InstallData scripts are obsolete. Please use data patches approach in module's Setup/Patch/Data dir	40	Medium	CRITICAL
Freento_SqlLog	app/code	0	221	High	WARNING

Module	Location	PHPCS Errors	PHPCS Warnings	Complexity	Attention Required
Freento_Log Analyzer	app/code	0	136	Medium	WARNING
Freento_GS ClientDemo	app/code	0	82	Medium	WARNING
Freento_OperationsCounter	app/code	0	75	Medium	WARNING

22 modules with 0 errors and <= 50 warnings not shown

Legend: **CRITICAL** immediate attention required, **WARNING** should be addressed, **OK** no issues

Detailed Findings

Module: Freento_DirectElastic

Purpose: Direct Elasticsearch integration for search functionality

Attention Required: **CRITICAL**

Issues Found:

File	Line	Issue	Severity	Recommendation
Setup/Patch/Data/AddOriginalNameAttribute.php	15	Class 'Zend_Validate_Exception' is restricted in /var/www/source/app/code/Freento/DirectElastic/Setup/Patch/Data/AddOriginalNameAttribute.php. Suggested replacement: Magento\Framework\Validator\ValidateException	ERROR	Must fix before deployment
Model/ConfigManager.php	156	"include" statement detected. File manipulations are discouraged. Variables inside are insecure.	ERROR	Must fix before deployment
Model/StaticController/SearchResult.php	45	Use of echo language construct is discouraged.	ERROR	Must fix before deployment
Model/StaticController/SearchResult.php	46	Use of exit language construct is discouraged.	ERROR	Must fix before deployment
Model/StaticController/SearchResult.php	49	Direct use of \$_GET Superglobal detected.	ERROR	Must fix before deployment
Model/StaticController/SearchResult.php	49	Direct use of \$_GET Superglobal detected.	ERROR	Must fix before deployment
Model/StaticController/SearchResult.php	50	Use of echo language construct is discouraged.	ERROR	Must fix before deployment

File	Line	Issue	Severity	Recommendation
Model/StaticController/SearchResult.php	51	Use of exit language construct is discouraged.	ERROR	Must fix before deployment
Model/StaticController/SearchResult.php	54	Direct use of \$_GET Superglobal detected.	ERROR	Must fix before deployment
Model/StaticController/SearchResult.php	55	Direct use of \$_GET Superglobal detected.	ERROR	Must fix before deployment
Model/StaticController/SearchResult.php	56	Direct use of \$_GET Superglobal detected.	ERROR	Must fix before deployment
Model/StaticController/SearchResult.php	56	Direct use of \$_GET Superglobal detected.	ERROR	Must fix before deployment
Model/StaticController/SearchResult.php	57	Direct use of \$_GET Superglobal detected.	ERROR	Must fix before deployment
Model/StaticController/SearchResult.php	124	Use of echo language construct is discouraged.	ERROR	Must fix before deployment

File	Line	Issue	Severity	Recommendation
Model/StaticController/SearchResult.php	125	Use of exit language construct is discouraged.	ERROR	Must fix before deployment

Module: Freento_McpAudit

Purpose: MCP audit tools for code quality analysis

Attention Required: **CRITICAL**

Issues Found:

File	Line	Issue	Severity	Recommendation
Model/Tool/RunCodeSniffer.php	114	The use of function exec() is forbidden; use \Magento\Framework\Shell::execute() instead	ERROR	Must fix before deployment
Model/Tool/GetLogErrors.php	188	The use of function exec() is forbidden; use \Magento\Framework\Shell::execute() instead	ERROR	Must fix before deployment
Model/Tool/GetThirdPartyModules.php	234	array_merge(...) is used in a loop and is a resources greedy construction.	WARNING	Optimize for better performance
Model/Tool/GetLogErrors.php	121	The use of function glob() is discouraged; use \Magento\Framework\Filesystem\Glob::glob() instead	WARNING	Replace with Magento-recommended alternative
Model/Tool/GetLogErrors.php	174	The use of function is_readable() is discouraged; use \Magento\Framework\Filesystem\DriverInterface::isReadable() instead	WARNING	Replace with Magento-recommended alternative
Model/Tool/GetLogErrors.php	174	The use of function filesize() is discouraged	WARNING	Replace with Magento-recommended alternative
Model/Tool/GetLogErrors.php	178	The use of function basename() is discouraged	WARNING	Replace with Magento-recommended alternative
Model/Tool/GetLogErrors.php	183	The use of function escapeshellarg() is discouraged	WARNING	Replace with Magento-recommended alternative
Model/Tool/GetLogFileSizes.php	68	Empty CATCH statement detected	WARNING	Add proper error handling or remove empty block

File	Line	Issue	Severity	Recommendation
Model/Tool/GetLogFileSizes.php	75	The use of function <code>is_dir()</code> is discouraged; use <code>Magento\Framework\Filesystem\DriverInterface::isDirectory()</code> instead	WARNING	Replace with Magento-recommended alternative
Model/Tool/GetLogFileSizes.php	78	Empty CATCH statement detected	WARNING	Add proper error handling or remove empty block
Model/Tool/GetLogFileSizes.php	100	The use of function <code>is_dir()</code> is discouraged; use <code>Magento\Framework\Filesystem\DriverInterface::isDirectory()</code> instead	WARNING	Replace with Magento-recommended alternative

Module: Freento_SystemHealth

Purpose: System health monitoring and diagnostics

Attention Required: **CRITICAL**

Issues Found:

File	Line	Issue	Severity	Recommendation
Model/Monitor/Cache/VarnishPresence.php	109	Silencing errors is discouraged; found: @fsockopen	ERROR	Must fix before deployment
Setup/Patch/Data/SearchTermsMonitor.php	30	Possible useless method overriding detected	WARNING	Address to improve code quality
Model/Monitor/Filesystem/LogsSize.php	117	The use of function is_file() is discouraged; use Magento\Framework\Filesystem\DriverInterface::isFile() instead	WARNING	Replace with Magento-recommended alternative

For detailed PHPCS report see [Attachment A: Code Sniffer Report](#)

4.1.2.1 Summary

Analysis of 32 custom modules in app/code found 21 PHPCS errors across 6 modules requiring immediate attention, and 1191 warnings. 4 additional modules exceed the 50-warning threshold and should be reviewed. 22 modules are within acceptable quality thresholds. Priority should be given to Freento_DirectElastic (15 errors including direct superglobal usage and security concerns) and WatchDog_AgeGate / DD_AgeGate (obsolete InstallData scripts).

4.1.3 Detailed Audit of app/code Modules

Module: Freento_DirectElastic

Aspect	Finding	Severity
Code Quality	15 PHPCS errors and 48 warnings found. Significant coding standard violations detected.	CRITICAL
Performance Impact	6 performance-related issues found. Discouraged functions and patterns in use.	WARNING
Security	17 security issues including critical violations. Direct superglobal usage and/or unescaped output detected.	CRITICAL
Compatibility	1 compatibility issue(s). Legacy/deprecated APIs or obsolete patterns in use.	WARNING

Module: Freento_McpAudit

Aspect	Finding	Severity
Code Quality	2 PHPCS error(s) and 107 warning(s). Minor coding standard issues present.	WARNING
Performance Impact	8 performance-related issues found. Discouraged functions and patterns in use.	WARNING
Security	2 security issues including critical violations. Direct superglobal usage and/or unescaped output detected.	CRITICAL
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_SystemHealth

Aspect	Finding	Severity
Code Quality	1 PHPCS error(s) and 96 warning(s). Minor coding standard issues present.	WARNING
Performance Impact	10 performance-related issues found. Discouraged functions and patterns in use.	WARNING
Security	14 security warnings. Multiple unescaped output or superglobal usage instances.	WARNING
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_AuditDoc

Aspect	Finding	Severity
Code Quality	1 PHPCS error(s) and 91 warning(s). Minor coding standard issues present.	WARNING
Performance Impact	No performance-impacting patterns detected.	OK
Security	44 security issues including critical violations. Direct superglobal usage and/or unescaped output detected.	CRITICAL
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: WatchDog_AgeGate

Aspect	Finding	Severity
Code Quality	1 PHPCS error(s) and 49 warning(s). Minor coding standard issues present.	WARNING
Performance Impact	2 minor performance consideration(s). Review discouraged function usage.	INFO
Security	11 security warnings. Multiple unescaped output or superglobal usage instances.	WARNING
Compatibility	1 compatibility issue(s). Legacy/deprecated APIs or obsolete patterns in use.	WARNING

Module: DD_AgeGate

Aspect	Finding	Severity
Code Quality	1 PHPCS error(s) and 40 warning(s). Minor coding standard issues present.	WARNING
Performance Impact	2 minor performance consideration(s). Review discouraged function usage.	INFO
Security	8 security warnings. Multiple unescaped output or superglobal usage instances.	WARNING
Compatibility	1 compatibility issue(s). Legacy/deprecated APIs or obsolete patterns in use.	WARNING

Module: Freento_SqlLog

Aspect	Finding	Severity
Code Quality	221 PHPCS warnings. Numerous style and documentation issues.	WARNING
Performance Impact	1 minor performance consideration(s). Review discouraged function usage.	INFO
Security	5 minor security warning(s). Review template escaping.	INFO
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_LogAnalyzer

Aspect	Finding	Severity
Code Quality	136 PHPCS warnings. Numerous style and documentation issues.	WARNING
Performance Impact	1 minor performance consideration(s). Review discouraged function usage.	INFO
Security	No security issues detected by PHPCS analysis.	OK
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_GSClientDemo

Aspect	Finding	Severity
Code Quality	82 PHPCS warnings. Some style improvements recommended.	INFO
Performance Impact	No performance-impacting patterns detected.	OK
Security	14 security warnings. Multiple unescaped output or superglobal usage instances.	WARNING
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_OperationsCounter

Aspect	Finding	Severity
Code Quality	75 PHPCS warnings. Some style improvements recommended.	INFO
Performance Impact	1 minor performance consideration(s). Review discouraged function usage.	INFO
Security	13 security warnings. Multiple unescaped output or superglobal usage instances.	WARNING
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_GSPricesParser

Aspect	Finding	Severity
Code Quality	48 PHPCS warnings. Some style improvements recommended.	INFO
Performance Impact	1 minor performance consideration(s). Review discouraged function usage.	INFO
Security	1 minor security warning(s). Review template escaping.	INFO
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_EmailSpamChecker

Aspect	Finding	Severity
Code Quality	42 PHPCS warnings. Some style improvements recommended.	INFO
Performance Impact	2 minor performance consideration(s). Review discouraged function usage.	INFO
Security	12 security warnings. Multiple unescaped output or superglobal usage instances.	WARNING
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_FastSearchAutocomplete

Aspect	Finding	Severity
Code Quality	27 PHPCS warnings. Some style improvements recommended.	INFO
Performance Impact	No performance-impacting patterns detected.	OK
Security	1 minor security warning(s). Review template escaping.	INFO
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_ReactTokenSessionSync

Aspect	Finding	Severity
Code Quality	Only 18 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	No security issues detected by PHPCS analysis.	OK
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_FullPageCacheAnalyzer

Aspect	Finding	Severity
Code Quality	Only 17 minor warnings. Code follows Magento standards well.	OK
Performance Impact	1 minor performance consideration(s). Review discouraged function usage.	INFO
Security	5 minor security warning(s). Review template escaping.	INFO
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_PerformanceSuite

Aspect	Finding	Severity
Code Quality	Only 15 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	3 minor security warning(s). Review template escaping.	INFO
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_NewRelic

Aspect	Finding	Severity
Code Quality	Only 11 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	5 minor security warning(s). Review template escaping.	INFO
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_Pos

Aspect	Finding	Severity
Code Quality	Only 11 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	No security issues detected by PHPCS analysis.	OK
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_CronAnalyzer

Aspect	Finding	Severity
Code Quality	Only 11 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	No security issues detected by PHPCS analysis.	OK
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_QueueArea

Aspect	Finding	Severity
Code Quality	Only 10 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	No security issues detected by PHPCS analysis.	OK
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_PaymentMethod

Aspect	Finding	Severity
Code Quality	Only 8 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	No security issues detected by PHPCS analysis.	OK
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_ConfirmPopup

Aspect	Finding	Severity
Code Quality	Only 7 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	No security issues detected by PHPCS analysis.	OK
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_CsStandard

Aspect	Finding	Severity
Code Quality	Only 5 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	No security issues detected by PHPCS analysis.	OK
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_EmailsLog

Aspect	Finding	Severity
Code Quality	Only 3 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	No security issues detected by PHPCS analysis.	OK
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Space_CookieWarning

Aspect	Finding	Severity
Code Quality	Only 3 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	No security issues detected by PHPCS analysis.	OK
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_Mcp

Aspect	Finding	Severity
Code Quality	Only 2 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	No security issues detected by PHPCS analysis.	OK
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_AdvancedCriticalCss

Aspect	Finding	Severity
Code Quality	Only 2 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	No security issues detected by PHPCS analysis.	OK
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_SqlLogAdvancedActions

Aspect	Finding	Severity
Code Quality	Only 2 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	No security issues detected by PHPCS analysis.	OK
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_Unit

Aspect	Finding	Severity
Code Quality	Only 1 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	No security issues detected by PHPCS analysis.	OK
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_AuditReport

Aspect	Finding	Severity
Code Quality	Only 1 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	No security issues detected by PHPCS analysis.	OK
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Freento_Bfcache

Aspect	Finding	Severity
Code Quality	Only 1 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	No security issues detected by PHPCS analysis.	OK
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

Module: Theme_Test

Aspect	Finding	Severity
Code Quality	Only 1 minor warnings. Code follows Magento standards well.	OK
Performance Impact	No performance-impacting patterns detected.	OK
Security	No security issues detected by PHPCS analysis.	OK
Compatibility	No compatibility issues detected. Module uses current Magento APIs.	OK

[app/code Detailed Audit Summary](#)

Detailed audit of 32 app/code modules reveals that the majority of issues are documentation and annotation-related warnings (1191 total warnings). Critical concerns include: Freento_DirectElastic with 15 errors involving direct \$_GET superglobal access, echo/exit usage, and include statements

which pose security risks; Freento_McpAudit with forbidden exec() calls; Freento_SystemHealth with error suppression (@fsockopen); and Freento_AuditDoc with forbidden shell_exec() usage. WatchDog_AgeGate and DD_AgeGate use obsolete InstallData scripts that should be migrated to data patches. The most common warnings are annotation formatting (632 occurrences), template security warnings (170), and LESS styling issues (139).

5. Log Analysis

5.1 File System Logs

Log File	Size	Status	Notes

5.1.1 Summary

Overall Status: CRITICAL — 10,112 total errors found across 79 distinct error groups in the last 7 days (2026-02-03 to 2026-02-10). Log file sizes are within acceptable limits (largest: debug.log at 37.51 MB). One log file (swoole_graphql.log, created 2025-11-20) has not been rotated in over 80 days, indicating log rotation is not fully configured.

Key patterns identified:

1. **Vimeo source map resolution failure** — 4,224 occurrences (ERROR + CRITICAL). The file 'vimeo/player.js.map' cannot be resolved for the Luma frontend theme, generating continuous errors on every page request. This is the single largest source of log noise.
2. **Expired SSL certificate on Composer repository** — 59 error groups (~3,800 occurrences total) caused by an expired SSL certificate on repo.composer.frento.com. This blocks all composer package updates and installations from the private repository. All 59 groups share one root cause.
3. **Missing media asset** — 1,976 CRITICAL occurrences for a missing CMS media image (wysiwyg/womens/womens-main.jpg).
4. **Module DI errors** — Multiple Freento module classes (DimensionalShipping, McpAudit tools) have dependency injection or class-not-found issues totaling ~80 occurrences across 10 groups.
5. **Infrastructure errors** — Isolated database socket (SQLSTATE 2002), OpenSearch cluster unavailability, and mail server connectivity issues were observed but appear transient (low counts, single-day occurrence).

5.2 Cron Execution Log and Cron Schedule

5.2.1 Cron Jobs Overview

Job Code	Group	Schedule	Expected Frequency	Status	Last Run	Duration	Notes
indexer_clean_all_changelogs	index	0 * * * *	every 1 hour	NO_EXECUTIONS	Never	N/A	No executions found — cron may not be running for this job
indexer_reindex_all_invalid	index	* * * * *	every 1 minute	OVERDUE	2025-03-05 02:05:51	0s	Overdue: last success 2025-03-05 02:05:51, expected every 1 minute
indexer_update_all_views	index	* * * * *	every 1 minute	OVERDUE	2025-09-24 06:49:24	0s - 13m	Overdue: last success 2025-09-24 06:49:24, expected every 1 minute. Has long-running executions (up to 13 min).

5.2.2 Cron Execution History

Period	Success	Missed	Error	Pending
Last 24h	0	0	0	0
Last 7 days	0	0	0	0
Last 30 days	0	0	0	0
Last year	107	216	1	410

5.2.3 Summary

CRITICAL — Cron is effectively non-operational. There have been zero scheduled job executions in the last 30 days. The overall cron schedule contains 803 total records (410 pending, 216 missed, 166 success, 11 error). The last successful execution of any regularly scheduled job was on 2026-01-20 (fpc_system_health_alert), while most default group jobs last ran on 2025-03-05. The error rate within recorded jobs is low (1.4% = 11 errors / 803 total), but the fundamental problem is that cron is not running at all. Of 73 configured cron jobs, 26 are overdue and 47 have never executed. The 216 missed jobs indicate that cron scheduling was attempted but the runner stopped executing. This means critical processes such as order email sending, indexing, sales report aggregation, sitemap generation, and security cleanup are all non-functional.

5.2.4 Long-running Jobs

Job Code	Avg Duration	Max Duration	Status
indexer_update_all_views	9m 49s	13m 0s	WARNING

5.2.5 Summary

WARNING — One job exceeds the 5-minute threshold: `indexer_update_all_views` had 2 executions over 5 minutes (13m and 6m 38s, averaging ~9m 49s). This occurred during reindexing on 2025-08-06 and is within the 5-30 minute warning range. No jobs exceeded 30 minutes. When cron is restored, monitor `indexer_update_all_views` execution times and consider optimizing indexer configuration if durations persist above 5 minutes.

5.2.6 Cron Groups Configuration

Group	Schedule Generate	Schedule Ahead	History Cleanup	History Success	History Failure	Notes
index	1 min	4 min	10 min	60 min	4320 min (3d)	WARNING : history_success_lifetime (60 min) is below 1440 min (24h). Success history is purged too quickly for effective monitoring.
default	15 min	20 min	10 min	60 min	4320 min (3d)	WARNING : history_success_lifetime (60 min) is below 1440 min (24h). Success history is purged too quickly for effective monitoring.
consumers	15 min	20 min	10 min	60 min	600 min (10h)	WARNING : history_success_lifetime (60 min) and history_failure_lifetime (600 min) are both below 1440 min (24h). History is purged too quickly.
aw_sarp2_payments	15 min	20 min	10 min	60 min	600 min (10h)	WARNING : history_success_lifetime (60 min) and history_failure_lifetime (600 min) are both below 1440 min (24h). History is purged too quickly.
aw_sarp2_daily_jobs	15 min	20 min	10 min	60 min	600 min (10h)	WARNING : history_success_lifetime (60 min) and history_failure_lifetime (600 min) are both below 1440 min (24h). History is purged too quickly.
amasty_base	1 min	4 min	10 min	60 min	600 min (10h)	WARNING : history_success_lifetime (60 min) and history_failure_lifetime (600 min) are both below 1440 min (24h). History is purged too quickly.
amasty_cron_schedule	1 min	4 min	10 min	60 min	600 min (10h)	WARNING : history_success_lifetime (60 min) and history_failure_lifetime (600 min) are both below 1440 min (24h). No jobs configured in this group.
baseprovider	5 min	20 min	10 min	60 min	600 min (10h)	WARNING : history_success_lifetime (60 min) and history_failure_lifetime (600 min) are both below 1440 min (24h). History is purged too quickly.

Group	Schedule Generate	Schedule Ahead	History Cleanup	History Success	History Failure	Notes
freento_gspricesparser	60 min	120 min	1440 min (1d)	4320 min (3d)	10080 min (7d)	OK : History lifetimes are adequate for monitoring and debugging.
freento_cron_analyzer	1 min	4 min	120 min (2h)	120 min (2h)	1440 min (1d)	WARNING : history_success_lifetime (120 min) is below 1440 min (24h). Success history is purged too quickly.
fpc_system_health_monitor	1 min	20 min	60 min	1440 min (1d)	4320 min (3d)	OK : History lifetimes meet the minimum threshold.

5.2.7 Summary

WARNING — 9 out of 11 cron groups have history_success_lifetime set below the recommended 1440 minutes (24 hours). The default value of 60 minutes means successful job records are purged within an hour, making it extremely difficult to diagnose issues or verify that jobs ran correctly. Additionally, 7 groups have history_failure_lifetime below 1440 minutes (ranging from 600 to 600 minutes), meaning error records are lost within 10 hours. Only freento_gspricesparser (3d success / 7d failure) and fpc_system_health_monitor (1d success / 3d failure) have adequate retention. It is recommended to increase history_success_lifetime to at least 1440 min (24h) and history_failure_lifetime to at least 4320 min (3d) across all groups.

6. Emails Quality Audit

6.1 Summary

Email delivery is functional with a mail-tester.com score of 7.9/10. SPF, DKIM, and DMARC all pass successfully. The server IP (95.217.45.80) is not listed on any of the 23 checked blocklists. Key issues include: reverse DNS not matching the sending domain, missing Message-Id header, missing List-Unsubscribe header, no text/plain alternative in email body, and 8 broken links pointing to the local domain m246.loc (expected for a development/staging environment). The sender address is smoliar.stas@frento.com via mailbox.frento.com.

6.2 Test Email (via mail-tester.com)

Aspect	Result	Status
Email Delivery	Sent successfully via mailbox.freento.com (95.217.45.80), subject: "Welcome to Main Website Store", sender: smoliar.stas@freento.com	OK
Spam Score	7.9/10 (SpamAssassin score: -0.1; missing Message-Id header, no text/plain part, reverse DNS mismatch, 8 broken links to m246.loc)	WARNING
SPF	Pass — server 95.217.45.80 is authorized to send for freento.com	OK
DKIM	Valid — DKIM signature is valid and comes from author's domain (freento.com)	OK
DMARC	Pass — message passed DMARC authentication test	OK
Blacklist Status	Clean — not listed on any of 23 checked IPv4 blocklists (Spamhaus SBL/CSS/XBL/PBL, Barracuda, SORBS, SPAMCOP, and others)	OK

6.3 Detailed Findings

Finding	Details	Impact
Reverse DNS Mismatch	Reverse DNS for 95.217.45.80 does not match the sending domain freento.com	WARNING
Missing Message-Id Header	SpamAssassin rule MISSING_MID triggered (-0.14 score penalty)	WARNING
No Text/Plain Alternative	SpamAssassin rule MIME_HTML_ONLY triggered (-0.1 penalty); emails contain only text/html MIME part	WARNING
Missing List-Unsubscribe Header	No List-Unsubscribe header found in transactional email	INFO
Broken Links (8)	All links point to m246.loc (local domain not resolvable externally); expected for development/staging environment	WARNING
SPF HELO Record	HELO hostname does not publish an SPF record (minor, SPF_HELO_NONE rule)	INFO

6.4 Other Transactional Emails

Note: Individual transactional email checks (Customer Registration, Password Reset, Order Confirmation, etc.) are not performed automatically. These can be verified manually.

7. Security Audit

7.1 Summary

The security audit reveals multiple critical issues that require immediate attention. The store is running Magento 2.4.6-p12 which has known CVEs (APSB25-88, CVE-2025-54236). Two-factor authentication (2FA) is not installed, the admin URL uses the default /admin path, Xdebug is enabled in a developer deployment mode, HTTPS is not enforced, admin session lifetime is set to 1 year (31536000 sec), and admin password lifetime is unlimited. Several important security response headers are missing (HSTS, Referrer-Policy, Permissions-Policy) and the Content-Security-Policy is in report-only mode with unsafe-inline and unsafe-eval directives. There are 4 admin accounts, including accounts with no assigned role. No locked admin accounts were found.

7.2 Magento Version Security

Check	Value	Status	Notes
Installed Version	2.4.6-p12 (Community)	WARNING	
Latest Available Version	2.4.8 / 2.4.7-p7 / 2.4.6-p14		
Security Patches Applied	p12 (newer patches p13/p14 available)	WARNING	
End of Life Status	Regular support ends August 11, 2026	WARNING	
Known Vulnerabilities	CVE-2025-54236 (Improper Input Validation, REST API account takeover), APSB25-88	CRITICAL	CVEs affecting this version

Version Security Summary

Magento 2.4.6-p12 (Community) is installed. This version is affected by known vulnerabilities including CVE-2025-54236 (Improper Input Validation via REST API allowing customer account takeover) disclosed in APSB25-88. Newer security patches (2.4.6-p13 and 2.4.6-p14) are available that address these issues. The 2.4.6 line reaches end of regular support on August 11, 2026. An upgrade to at least 2.4.6-p14 is urgently recommended, with a planned migration to the 2.4.7 or 2.4.8 line before EOL.

7.3 Admin Security

Check	Value	Status	Recommendation
Admin URL	/admin (default)	CRITICAL	Use custom URL
Admin 2FA	Module not installed	CRITICAL	Enable 2FA
Password Lifetime	Unlimited (no expiry)	CRITICAL	
Session Lifetime	31536000 sec (365 days)	CRITICAL	
Failed Login Lockout	6 failures / 600 min threshold	OK	
CAPTCHA	Enabled	OK	

Active Administrators

Username	Email	Role	Last Login	Status
adminDev	adminDev@adminDev.com	Administrators	2026-01-27 02:31:11	ACTIVE
hucky	hucky@frento.com	Administrators	2023-05-03 04:43:27	ACTIVE (LAST LOGIN >2 YEARS AGO)
hucky	hucky@frento.com	No Role	2023-05-03 04:43:27	ACTIVE (NO ROLE ASSIGNED)
admin	admin@frento.com	No Role	Never	ACTIVE (NEVER LOGGED IN, NO ROLE)

Locked Administrators

Username	Email	Lock Reason	Locked Since
No locked administrator accounts found.			

7.3 Application Security

Check	Value	Status
Xdebug	Enabled (mode: debug)	CRITICAL
Error Display	Developer mode (errors visible)	CRITICAL
Encryption Key Rotation	Not performed	WARNING
HTTPS Enforcement	Not enforced (HTTP serves content without redirect)	CRITICAL

Security Response Headers

Header	Present	Status	Notes
Content-Security-Policy	REPORT-ONLY	WARNING	CSP is in report-only mode (not enforced); contains 'unsafe-inline' and 'unsafe-eval' directives
X-Frame-Options	YES	OK	SAMEORIGIN
X-Content-Type-Options	YES	OK	nosniff
Strict-Transport-Security	NO	CRITICAL	HSTS header is missing; browsers will not enforce HTTPS
Referrer-Policy	NO	CRITICAL	Missing; referrer information may leak to third parties
Permissions-Policy	NO	CRITICAL	Missing; browser features (camera, microphone, geolocation) not restricted
X-XSS-Protection	YES	OK	1; mode=block

7.3.1 Summary

Application security has several critical issues. Xdebug is enabled in debug mode on a live-accessible environment, which exposes internal application state and significantly degrades performance. The deployment mode is set to "developer", causing detailed error messages to be displayed to end users. HTTPS is not enforced -- HTTP requests serve content directly without redirecting to HTTPS, leaving all traffic vulnerable to interception. The encryption key has never been rotated. On the positive side, X-Frame-Options (SAMEORIGIN), X-Content-Type-Options (nosniff), and X-XSS-Protection are properly configured. However, three critical security headers are missing: Strict-Transport-Security (HSTS), Referrer-

Policy, and Permissions-Policy. The Content-Security-Policy header is present but only in report-only mode and includes 'unsafe-inline' and 'unsafe-eval' directives, which weaken its protective value.

8. Performance Audit

8.1 Database Performance

Table Sizes (Top 20)

Table	Size (MB)	Rows	Engine	Status
freento_loganalyzer_log	2,465.19	421,207	InnoDB	CRITICAL
freento_fpc_miss_log	37.55	17,310	InnoDB	OK

Slow Queries

Query Pattern	Avg Time	Count (24h)	Status
Slow query log analysis not available via MCP tools – manual review recommended	N/A	N/A	INFO

8.1.1 Summary

Critical issue detected: the `freento_loganalyzer_log` table has grown to 2,465 MB (2.4 GB) with 421,207 rows. This is a third-party log table that should be kept small and is severely bloated. It likely impacts database backup times, replication lag, and overall disk usage. The

freento_fpc_miss_log table (37.55 MB) is within acceptable limits but should be monitored as it is also a log table that can grow over time. Only 2 tables exceed the 10 MB threshold, indicating the core Magento database footprint is healthy. Slow query analysis was not performed as it is not available via MCP tools and requires manual server-side review.

8.3 Indexers

Indexer	Mode	Status	Last Updated	Duration
design_config_grid	Update by Schedule	VALID	N/A	N/A
customer_grid	Update by Schedule	VALID	N/A	N/A
catalog_category_product	Update by Schedule	VALID	N/A	N/A
catalog_product_category	Update by Schedule	VALID	N/A	N/A
catalogrule_rule	Update by Schedule	VALID	N/A	N/A
catalog_product_attribute	Update by Schedule	VALID	N/A	N/A
inventory	Update by Schedule	VALID	N/A	N/A
catalogrule_product	Update by Schedule	VALID	N/A	N/A
cataloginventory_stock	Update by Schedule	VALID	N/A	N/A
catalog_product_price	Update by Schedule	VALID	N/A	N/A
catalogsearch_fulltext	Update by Schedule	VALID	N/A	N/A

8.3.1 Summary

All 11 indexers are in excellent condition. Every indexer reports a "valid" status with "Update by Schedule" mode and zero backlog. This is the recommended configuration for production Magento stores, ensuring that indexing occurs asynchronously via cron rather than blocking admin operations. No reindexing is required at this time.

8.2 Frontend Performance

8.2.1 SQL Queries per Page

Page	URL	Run 1	Run 2	Run 3	Median	Status
Homepage	/	67	67	67	67	OK
Category	/women/tops-women.html	246	165	165	165	WARNING
Product	/radiant-tee.html	185	182	182	182	CRITICAL
Cart	/checkout/cart/	17	17	17	17	OK
Checkout	/checkout/	6	6	6	6	OK

Thresholds: Homepage <100, Category <150, Product <120, Cart/Checkout <100

8.2.2 Core Web Vitals & Network Metrics

Each page measured 3 times. Median values used for status evaluation.

Homepage

Status	POOR	GOOD	GOOD	CRITICAL	GOOD	CRITICAL

8.2.3 JavaScript Console Errors

Page	Error	Count	Severity
All pages	Mismatched anonymous define() module — cookieconsent library loaded via CDN conflicts with RequireJS. Two versions loaded simultaneously (v2.8.6 and v3.0.0) from cdn.jsdelivr.net	1 per page load	CRITICAL
Homepage	Form element missing autocomplete attribute	1	INFO
Category	Form element missing autocomplete attribute	1	INFO
Product	Form element missing autocomplete attribute	1	INFO
Cart	Form element missing autocomplete attribute	1	INFO
Checkout	Form element missing autocomplete attribute	1	INFO

8.2.4 Summary

Core Web Vitals are generally good — LCP and CLS scores are within acceptable thresholds on most pages. TTFB is excellent on content pages (166-173 ms) but poor on Cart/Checkout (725-740 ms), indicating slow server-side processing for these dynamic pages. The primary concern is the **excessive number of network requests** (223-290 per page), all pages exceeding the 200-request critical threshold. This is caused by Magento's non-bundled RequireJS module loading in developer mode. Additionally, the **product page executes 182 SQL queries** (critical threshold: >120) and the **category page executes 165 queries** (warning threshold: 150-250). A persistent **JS runtime error from the cookieconsent library**

(Mismatched anonymous define()) appears on every page due to loading two conflicting versions (v2.8.6 and v3.0.0) via CDN alongside RequireJS. Page sizes are under 3 MB across all pages, which is acceptable.

9. Recommendations

9.1 Critical (Immediate Action Required)

#	Area	Issue	Recommendation	Impact
1	Environment / Security	Deployment mode is 'developer' — all production optimizations disabled, exposes debug info	Switch to production mode immediately (<code>bin/magento deploy:mode:set production</code>)	Performance, Security
2	Environment / Security	Xdebug is enabled in debug mode — severe performance degradation and security exposure	Disable Xdebug on all non-development environments	Performance, Security
3	Environment	Redis 6.0.16 is below minimum supported version 7.0	Upgrade Redis to version 7.0 or higher	Stability, Performance
4	Cron	Cron is effectively non-operational: zero executions in last 30 days	Restore cron execution immediately; verify the system crontab entry and run <code>bin/magento cron:run</code>	Operations, Data Integrity
5	Cron	All 73 configured jobs not running — 26 overdue, 47 never executed	Verify all 73 jobs begin executing after cron restoration; check for errors in each group	Operations
6	Cron	PHP deprecation errors in SystemHealth cron job	Fix PHP deprecation issues in the SystemHealth cron handler	Stability
7	Cron	Order email sending jobs not running since March 2025	Verify order confirmation and transactional emails are being sent after cron restoration	Business, Customer Experience

#	Area	Issue	Recommendation	Impact
8	Security	2FA module is NOT installed; default /admin URL exposed	Install and enable Magento 2FA module; change the admin URL to a non-default path	Security
9	Security	Known CVEs (CVE-2025-54236, APSB25-88) — newer security patches available	Apply the latest Magento security patches immediately	Security
10	Security	HTTPS not enforced on storefront or admin	Enforce HTTPS for both storefront and admin panel in Stores > Configuration	Security
11	Security	Admin session lifetime set to 365 days (extremely excessive)	Reduce admin session lifetime to 900–3600 seconds	Security
12	Security	Unlimited password lifetime for admin accounts	Set password lifetime to 90 days maximum	Security
13	Security	Missing HSTS header — no transport security enforcement	Add Strict-Transport-Security header with at least 1 year max-age	Security
14	Logs	Expired SSL certificate on repo.composer.freento.com (59 error groups, ~3,800 occurrences)	Renew the SSL certificate for repo.composer.freento.com immediately	Operations, Deployability
15	Logs	Vimeo player.js.map errors (4,224 errors in 7 days)	Fix or suppress Vimeo player source map loading; update Vimeo integration	Log Noise, Debugging
16	Logs	Missing CMS media asset (1,976 CRITICAL exceptions)	Restore the missing media asset or remove the reference from CMS content	User Experience, Log Noise

#	Area	Issue	Recommendation	Impact
17	Logs	DimensionalShipping class errors in logs	Fix or remove the DimensionalShipping class causing exceptions	Stability
18	Code Quality	Payment modules have pending security/feature updates	Update all payment modules to their latest versions	Security, Compliance
19	Code Quality	5 overlapping cookie-consent modules detected	Consolidate to a single cookie-consent solution; disable/remove redundant modules	Performance, Maintainability
20	Code Quality	Freento_DirectElastic: 15 critical PHPCS errors including direct \$_GET access, echo/exit usage	Refactor DirectElastic module to use proper request objects, controllers, and return types	Security, Code Quality
21	Code Quality	Freento_McpAudit uses forbidden exec() function calls	Replace exec() with safe Magento-native alternatives or Symfony Process component	Security
22	Code Quality	Freento_AuditDoc uses forbidden shell_exec()	Remove shell_exec() usage; use Magento framework APIs instead	Security
23	Code Quality	WatchDog_AgeGate and DD_AgeGate use obsolete InstallData scripts	Migrate from InstallData/InstallSchema to db_schema.xml and data patches	Maintainability, Upgrade Safety
24	Code Quality	Error suppression operators detected in custom modules	Remove all @ error suppression operators; implement proper error handling	Code Quality, Debugging
25	Performance	freento_loganalyzer_log table is 2,465 MB (2.4 GB) — critically oversized	Truncate the loganalyzer_log table and implement retention policy	Database Performance

#	Area	Issue	Recommendation	Impact
2 6	Performance	Investigate if Log Analyzer module is needed given its massive data footprint	Evaluate whether Freento_LogAnalyzer should be disabled or replaced with a lighter solution	Database Performance, Maintainability
2 7	Performance	Product page generates 182 SQL queries (Critical threshold)	Profile and reduce product page SQL queries; review plugins and blocks for redundant loads	Frontend Performance
2 8	Performance	Persistent cookieconsent JS error on every page load	Fix the cookieconsent JavaScript conflict caused by overlapping cookie-consent modules	User Experience, Frontend Stability
2 9	Performance	All pages exceed 200 network requests (Critical threshold)	Reduce network requests through bundling, lazy loading, and removing unused assets	Page Load Speed

9.2 Important (Should Be Addressed)

#	Area	Issue	Recommendation	Impact
1	Environment	Full Page Cache uses built-in handler instead of Varnish	Deploy Varnish as the FPC backend for production-grade caching	Performance
2	Environment	PHP max_execution_time set to 18,000 seconds (5 hours)	Reduce max_execution_time to 120–300 seconds; use async processing for long tasks	Stability, Security
3	Environment	Elasticsearch 7.17.29 at lower end of supported range	Migrate from Elasticsearch 7.17 to OpenSearch 2.x for long-term support	Stability, Future-proofing
4	Code Quality	14 third-party modules have newer versions available	Update all 14 outdated modules to their latest compatible versions	Security, Bug Fixes
5	Code Quality	24 app/code modules could be managed via Composer	Migrate app/code vendor modules to Composer-based installation for easier updates	Maintainability, Deployability
6	Code Quality	Modules with unknown versions cannot be tracked for updates	Review and document versions for all unknown-version modules	Maintainability
7	Code Quality	XSS warnings detected across custom modules	Fix cross-site scripting warnings by using proper escaping in templates and output	Security
8	Code Quality	Deprecated Zend framework classes still in use	Replace deprecated Zend_* classes with Laminas equivalents	Future Compatibility
9	Code Quality	SqlLog and LogAnalyzer modules have excessive PHPCS warnings	Reduce PHPCS warning count in SqlLog and LogAnalyzer modules	Code Quality

#	Area	Issue	Recommendation	Impact
10	Logs	McpAudit DI configuration error in logs	Fix the dependency injection configuration for the McpAudit module	Stability
11	Logs	Type errors and email sender configuration issues in logs	Fix type errors and correct email sender configuration	Stability, Email Delivery
12	Cron	9 of 11 cron groups have insufficient history lifetime	Increase cron history lifetime settings to retain at least 7 days of history	Monitoring, Debugging
13	Cron	Indexer execution times not monitored	Monitor indexer execution times after cron restoration; ensure they complete within schedule	Performance
14	Cron	No cron health monitoring in place	Set up external cron health monitoring (e.g., Cronitor, Healthchecks.io)	Operations
15	Email	Reverse DNS mismatch on mail server	Configure reverse DNS (PTR record) to match the sending hostname	Email Deliverability
16	Email	Missing Message-Id header in outgoing emails	Add a proper Message-Id header to all outgoing emails	Email Deliverability
17	Email	No text/plain alternative in emails	Include a text/plain alternative body in all transactional emails	Email Deliverability, Accessibility
18	Email	8 broken links pointing to m246.loc (dev domain)	Update base URL to production domain before go-live	User Experience
19	Security	Missing Referrer-Policy and Permissions-Policy headers	Add Referrer-Policy (strict-origin-when-cross-origin) and Permissions-Policy headers	Security

#	Area	Issue	Recommendation	Impact
20	Security	CSP in report-only mode with unsafe-inline/unsafe-eval	Enforce Content Security Policy; work to eliminate unsafe-inline and unsafe-eval	Security
21	Security	2 admin accounts with 'No Role' assigned	Remove or assign proper roles to the 2 admin accounts with 'No Role'	Security
22	Security	Encryption key has never been rotated	Rotate the Magento encryption key and re-encrypt sensitive data	Security
23	Security	Magento 2.4.6 reaches End of Life in August 2026	Plan and begin migration to Magento 2.4.7+ before the August 2026 EOL date	Long-term Support, Security
24	Performance	fpc_miss_log table lacks log rotation	Implement log rotation for the fpc_miss_log table to prevent unbounded growth	Database Performance
25	Performance	MySQL slow query log not enabled	Enable MySQL slow query log to identify and optimize problematic queries	Diagnostics, Performance
26	Performance	Database backup timing not verified	Verify backup schedules do not overlap with peak traffic or cron execution windows	Operations
27	Performance	Cart and Checkout TTFB is poor (725–740ms)	Investigate and optimize Cart/Checkout TTFB; profile backend processing for these routes	Conversion Rate, User Experience
28	Performance	Category page generates 165 SQL queries (Warning threshold)	Reduce category page SQL queries; review layered navigation and product list plugins	Frontend Performance
29	Performance	Product page CLS of 0.11 exceeds recommended threshold	Fix Cumulative Layout Shift on product page by reserving space for dynamic elements	User Experience, SEO

9.3 Optional (Nice to Have)

#	Area	Issue	Recommendation	Impact
1	Environment	APCu not enabled for additional opcode/data caching	Enable APCu for supplementary caching	Performance
2	Environment	Running Magento 2.4.6 when 2.4.7 is available	Consider upgrading to Magento 2.4.7 for latest features and improvements	Features, Performance
3	Code Quality	Potentially unused third-party modules installed	Evaluate and remove unused third-party modules to reduce attack surface and complexity	Maintainability, Security
4	Code Quality	Test modules present in codebase	Remove test/development modules from production builds	Cleanliness
5	Code Quality	Missing or incorrect PHPDoc annotations in custom modules	Fix PHPDoc annotations for better IDE support and code documentation	Developer Experience
6	Code Quality	LESS file warnings in custom modules	Fix LESS/CSS warnings for cleaner frontend builds	Code Quality
7	Code Quality	Auto-fixable PHPCS issues detected	Run <code>phpcbf</code> to auto-fix formatting and minor coding standard violations	Code Quality
8	Logs	swoole_graphql.log not rotated (>80 days old)	Configure log rotation for all log files including swoole_graphql.log	Disk Management
9	Logs	Sample data related errors in logs	Clean up sample data errors if sample data is no longer needed	Log Clarity

#	Area	Issue	Recommendation	Impact
10	Logs	OpenSearch connection monitoring not configured	Monitor OpenSearch cluster health and connection stability	Proactive Monitoring
11	Cron	Unnecessary or unused cron jobs may be configured	Review and disable unnecessary cron jobs to reduce execution overhead	Performance
12	Cron	Index group jobs run in same process	Configure <code>use_separate_process</code> for the index cron group	Stability
13	Cron	Empty cron groups present in configuration	Remove empty cron groups to simplify configuration	Cleanliness
14	Email	No List-Unsubscribe header in marketing emails	Add List-Unsubscribe header for marketing/newsletter emails	Email Deliverability
15	Email	SPF record does not cover HELO/EHLO identity	Configure SPF record to also validate the HELO identity	Email Authentication
16	Email	No ARC (Authenticated Received Chain) configured	Consider implementing ARC for improved email forwarding authentication	Email Deliverability
17	Security	Stale admin accounts that have not logged in recently	Review and deactivate admin accounts with no recent login activity	Security
18	Security	Account lockout threshold may be too permissive	Reduce the failed login lockout threshold to 5 attempts or fewer	Security
19	Security	CSP uses <code>unsafe-inline/unsafe-eval</code> without nonce fallback	Implement CSP nonces to allow removal of <code>unsafe-inline/unsafe-eval</code> directives	Security

#	Area	Issue	Recommendation	Impact
20	Performance	No table size monitoring in place	Set up automated table size monitoring with alerts for abnormal growth	Proactive Monitoring
21	Performance	Log Analyzer retention policy not defined	Review and configure Log Analyzer data retention to prevent table regrowth	Database Performance
22	Performance	Missing autocomplete attributes on form fields	Add autocomplete attributes to checkout and login form fields	User Experience, Accessibility
23	Performance	HTTP/2 not detected	Implement HTTP/2 (or HTTP/3) for multiplexed connections and reduced latency	Page Load Speed
24	Performance	Cookie consent JS loaded from external CDN	Load cookieconsent JavaScript locally to reduce external dependencies and improve load time	Performance, Privacy

10. Overall Summary

Scores by Category

Category	Score	Status
Environment	3/10	CRITICAL
Code Quality	5/10	WARNING
Log Health	1.5/10	CRITICAL
Email Quality	7.9/10	WARNING
Security	2/10	CRITICAL
Performance	5.5/10	WARNING
Overall	3.9/10	CRITICAL

3.9/10

Key Findings

Strengths

1. Email delivery infrastructure is functional with SPF, DKIM, and DMARC all passing (7.9/10)
2. PHP 8.2, Composer 2.8, and MariaDB 10.6 are all within supported version ranges
3. All 11 indexers are valid and configured in 'Update by Schedule' mode
4. Cart and Checkout SQL query counts are excellent (17 and 6 respectively)
5. LCP (Largest Contentful Paint) is good across all pages (452–1,180ms)
6. TTFB is excellent on content pages (166–173ms)
7. Log file sizes are within acceptable limits
8. Blacklist status is clean for the mail server

Weaknesses

1. Cron system is completely non-operational — zero executions in 30 days, impacting order processing and all scheduled tasks
2. Critical security gaps: no 2FA, unpatched CVEs, HTTPS not enforced, default admin URL, 365-day session lifetime
3. Developer mode and Xdebug are enabled, crippling performance and exposing debug information
4. 10,112 log errors in 7 days across 79 groups, including 5 CRITICAL-level groups
5. freento_loganalyzer_log table has grown to 2.4 GB, degrading database performance
6. Custom modules contain forbidden functions (exec, shell_exec) and 15 critical PHPCS errors

7. Redis version 6.0.16 is below the minimum supported version 7.0
8. All pages exceed 200 network requests, impacting frontend load times

Next Steps

1. **Immediate (Week 1):** Restore cron execution, switch to production mode, disable Xdebug, and apply security patches
 2. **Urgent (Week 2):** Install 2FA, enforce HTTPS, add HSTS header, reduce admin session lifetime, set password lifetime, and change admin URL
 3. **Short-term (Weeks 3–4):** Renew SSL certificate for repo.composer.freento.com, truncate the 2.4 GB loganalyzer_log table, upgrade Redis to 7.0+, and fix critical PHPCS errors in custom modules
 4. **Medium-term (Month 2):** Deploy Varnish FPC, update all outdated third-party modules, consolidate cookie-consent modules, reduce product page SQL queries and network requests
 5. **Long-term (Quarter 2):** Migrate to OpenSearch 2.x, plan Magento 2.4.7 upgrade before 2.4.6 EOL (August 2026), enforce CSP, migrate app/code modules to Composer, and implement comprehensive monitoring
-

Top Recurring Issues

Issue	Occurrences	Files Affected	Auto-fixable
There must be exactly one blank line before tags	183	57	No
Missing short description	148	50	No
Unescaped output detected.	129	25	No
Comment block is missing	82	24	No
Line exceeds 120 characters	49	32	No
Properties sorted not alphabetically	44	9	No
Type is not specified	41	23	No
Short description should not be in multi lines	41	19	No
There must be exactly one blank line between lines short and long descriptions	38	26	No
If the @inheritdoc not inline it shouldn't have braces	27	6	No
Direct use of \$_SERVER Superglobal detected.	24	6	No
Line indented incorrectly; expected 4 spaces, found 2	24	1	No
Class properties must have type declaration using @var tag.	19	12	No
A variable should be used for a CSS colour	18	7	No

Issue	Occurrences	Files Affected	Auto-fixable
Missing PHP DocBlock for class property.	17	11	No

A.4 Recommendations

1. **Critical errors** - Must be fixed before deployment
2. **Warnings** - Should be addressed to maintain code quality
3. **Auto-fixable issues** - Can be resolved by running `vendor/bin/phpcbf`
