

Product Purchases

Magento 2 Extension

Extension description

With the Product Purchases extension you get a powerful sales report directly on the product edit page.

The report appears as an individual tab on the product edit screen and contains all possible data associated with a product purchase:

- order and customer data
- qtys and totals
- shipping/payment method
- and even discounts that were applied to an order

All report columns are sortable and almost all are filterable.

Main Features:

- Exhaustive list of report columns
- Columns are filterable and sortable
- Order #, Customer and Applied Discount Rules columns are clickable in addition, navigating you directly to associated admin pages
- Built-in multi store support
- Built-in export feature
- Restrict Product Purchases tab appearance on the admin role level via ACL resource

Extension Installation

Composer

1. Login to your account on <https://freento.com> website
2. Open My Composer Packages section in your account and follow the instructions there

Direct upload

1. Unpack the .zip file you've downloaded;
2. Connect to the server where the website source folder is located with FTP/SFTP client (WinSCP, Filezilla, Cyberduck, etc);
3. Upload the package directly into your Magento root folder

Do these steps after the extension installation:

1. bin/magento setup:upgrade
2. bin/magento setup:di:compile
3. bin/magento setup:static-content:deploy

Extension usage

1. Install the extension and a new tab will appear on the product edit screen:

The screenshot shows a vertical navigation menu on the left with icons for SALES, CATALOG, CUSTOMERS, and MARKETING. To the right, a list of tabs is displayed: Content, Configurations, Product Purchases (highlighted with a red box), and Product Reviews. Each tab has a dropdown arrow on its right side.

2. Once expanded, the tab will list all purchases associated with this product:

4. Access control management

If you don't want some admin roles to access the "Product Purchases" tab on the product edit screen, you can disable the "Product Purchases" ACL resource on the admin role edit screen:

The screenshot shows the 'System' menu with various options. The 'User Roles' option is highlighted with a red box. The menu items are as follows:

- Data Transfer
- Permissions
- Klarna
- Import
- All Users
- Logging
- Export
- Locked Users
- Support
- User Roles**
- Import/Export Tax Rates
- Import History
- Action Logs
- Extensions
- Bulk Actions
- Integrations
- Other Settings
- Tools
- Notifications
- Cache Management
- Custom Variables
- Index Management
- Manage Encryption Key

The screenshot shows the 'Role Information' page. The 'Role Name' field is set to 'Restrict user'. The page has a sidebar with 'Role Info' and 'Role Resources' (highlighted with a red box).

The screenshot shows the 'Roles Resources' page. The 'Role Resources' sidebar item is highlighted with a red box. The main content shows a tree view of resources with checkboxes. The 'Resource Access' dropdown is set to 'Custom'. The resources listed are:

- Dashboard
- Analytics
 - API
- Sales
 - Operations
 - Orders

- Catalog
 - Inventory
 - Products
 - Update Attributes
 - Product Purchases**
 - Edit Product Design
 - Categories
 - Edit Category Design
