

Product Purchases

Magento 2 Extension

Extension description

With Product Purchases extension you get a powerful sales report directly on the product edit page.

The report appears as an individual tab on the product edit screen and contains all possible data associated with a product purchase:

- order and customer data
- qtys and totals
- shipping/payment method
- and even discounts that were applied to an order

All report columns are sortable and almost all are filterable.

Moreover, you can export the resulting report for further importing and analysis.

Main Features:

- Exhaustive list of report columns
- Columns are filterable and sortable
- Order #, Customer and Applied Discount Rules columns are clickable in addition, navigating you directly to associated admin pages
- Built-in multi store support
- Built-in export feature
- Restrict Product Purchases tab appearance on the admin role level via ACL resource

Extension Installation

1. Extract the content for the ZIP file to <magento-root-dir>/app/code/
2. `php bin/magento maintenance:enable`
3. `php bin/magento module:enable Freento_ProductPurchases`
4. `php bin/magento setup:upgrade`
5. `php bin/magento setup:di:compile`
6. `php bin/magento maintenance:disable`

Extension usage

1. Install the extension and a new tab will appear on the product edit screen:

2. Once expanded, the tab will list all purchases associated with this product:

Product Purchases

4. Access control management

If you don't want some admin roles to access the "Product Purchases" tab on the product edit screen, you can disable the "Product Purchases" ACL resource on the admin role edit screen:
